## SUMMARY

Recent B.E. Computer Science graduate with hands-on experience in web, AI, and real-time application development using React.js, Next.js, Flutter, Firebase, and Supabase. Strong foundation in programming, data structures, databases, and AI development tools, with excellent problem-solving skills.

## TECHNICAL SKILLS

|                        |                                                  |
|------------------------|--------------------------------------------------|
| Programming Languages: | C, C++, Java                                     |
| Web Technologies:      | HTML, CSS, JavaScript                            |
| Frameworks:            | Flutter, React.js, Next.js                       |
| AI Development Tools:  | OpenAI Codex, Cursor AI, Replit AI               |
| APIs & Databases:      | RESTful APIs, MySQL, MongoDB, Supabase, Firebase |
| Core Concepts:         | Data Structures, OOPS, DBMS                      |

## EXPERIENCE & PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                         |                    |

| <b>AI Hire Pro</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | <i>React.js, Next.js, AI Tools, Supabase, REST APIs</i> | <b>AI Hire Pro</b> |
| <ul style="list-style-type: none"><li>Developed an AI-powered recruitment platform to streamline candidate sourcing, screening, evaluation, and hiring workflows.</li><li>Built responsive recruiter dashboards using React.js and Next.js for managing candidates, job requirements, and recruitment activities.</li><li>Integrated AI-assisted workflows to support candidate analysis and improve recruitment decision-making.</li><li>Implemented authentication and role-based access controls with Supabase for secure user and application data management.</li></ul> |                                                         |                    |
| <b>BolYaar</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | <i>Flutter (Dart), Firebase, Platform Security</i>      | <b>BolYaar</b>     |
| <ul style="list-style-type: none"><li>Co-developed a real-time social platform with closed-loop campus verification controls to regulate network access.</li><li>Configured Firebase database rule-sets to manage anonymous user posts and polls securely.</li><li>Audited traffic metrics and system connection logs to detect and mitigate malicious patterns.</li></ul>                                                                                                                                                                                                   |                                                         |                    |

## ACHIEVEMENTS

- Specialized in **OSINT Web Mining** and threat intelligence frameworks for academic projects.
- Analyzed **Fibre Channel network topologies** and data routing structures in advanced labs.
- Scored **98.86 percentile** in Naukri Campus Young Turks 2024 testing problem-solving capabilities.
- Completed **GfG 160 – 160 Days of Problem Solving** data structures technical sprint by GeeksforGeeks.

## EDUCATION

## POSITIONS OF RESPONSIBILITY

- SLIET Alumni Association:** *Active Member*
  - Contributed to alumni engagement initiatives and networking activities.
- SLIET Software Development Club:** *Active Member*
  - Engaged in technical discussions and collaborative development activities.
- TechFest'24 (Plexus):** *Member*
  - Assisted in organizing technical events and managing student participation.
